ACKNOWLEDGMENTS

This proceedings contains papers from the thirteenth conference in Semantics and Linguistic Theory, May 9-11, 2003, at the University of Washington. We thank the conference organizers and the reviewers who rated and commented on the many abstracts submitted to the conference. Thanks especially to the authors, whose patient assistance has made the editorial task a pleasure. Unfortunately, the papers presented by Elena Guerzoni, Angelika Kratzer and William A. Ladusaw were not available for publication in this volume.

Finally, thanks to CLC publications, Sheila Haddad, Devon Strolovitch, Angie Tinti and the Field of Linguistics at Cornell University for making the publication possible.
